

The children will be tested on their Learn Its each Friday. The Learn Its move from step 1 to 15. Once your child receives full marks for their step, they can move onto the next step. Once completing all of the steps, the children will receive the 'Ultimate Challenge!' Both addition and multiplication facts are tested within the Learn Its programme. I would recommend for children to continue to learn their multiplication facts alongside the earlier Learn Its facts. Children are expected to know their times tables facts from 2x-12x as rapid recall by the end of Year4 and reach step 15 of the programme.
